

Ullevaal Stadion in Oslo is the national football Stadium of Norway. It is also the home ground for the two top clubs Vålerengen and FC Lyn. In the period first of April till the end of November about 45 matches are being played here.

Since 1999 the Stadium has used the Bolidt flooring system in all spectator areas. It was a success from the start and has been rock solid since.

Even after seven years in use we are proud to show our spectator areas to the public. Mostly thanks to the Bolidt system.

Kind regards,

Kjell Borgersen
Stadium Manager
Ullevaal Stadion
